

PRODUCT UPDATE

Release Date : 10 July 2009

New Product Release - GPxX

Sokkia is proud to announce the release of the new Gyro Station, GPxX, that comes in four models for each angular accuracies of the Set X instrument.

GP1X: GP1 + SET1X
GP2X: GP1 + SET2X
GP3X: GP1 + SET3X
GP5X: GP1 + SET5X

GPxX can detect True North within 20" accuracy within 20 minutes anytime, anywhere. Pair it with the DLC1 remote controller and you have the convenience of wireless control operation for doing your job with ease.

Applications:

- Directional controls for tunneling
- Setting-out in underground constructions
- Roads, Railroads, Power lines, Pipelines and similar long and narrow construction projects.

DLC1 Remote Trigger

A simple 3-key remote trigger facilitates Enter key operation during Gyro measurement procedures. It also allows distance measurement to be triggered wirelessly.

Contact your nearest Sokkia dealer for more information.
