PRODUCT UPDATE

Release Date : 04 Nov 2008

SOKKIA GSR Reference Station Software V8.4.1 is Available

SOKKIA is pleased to announce that the latest version of GSR Reference Station Software V8.4.1 is now available. The new version includes several updates designed to improve overall performance of the software.

GSR Reference Station Software V8.4.1 Updates:

• New remote serial port connectivity (TCP access) for control of the GNSS receiver over the internet

• Improved RTK correction support for third-party GNSS rovers

• More robust connectivity to third-party reference networks

• Enhanced validation of authorization codes when upgrading firmware

• Improved reliability when logging GNSS data to computer serial ports (i.e. COM1)

• Improved NTRIP source table
