SOKKIA User Conference 2010, India Crowne Plaza Today Gurgaon, Delhi 22 Jan

On January 22, 2010 Sokkia Singapore held its first “Sokkia User Conference” at Crowne Plaza Hotel Today Gurgaon, India, paving the way for closer communication between Sokkia and its loyal customers.

This “by-invitation-only” event saw an attendance of over a hundred participants who were mainly SOKKIA loyal customers. It was kicked off with an introductory message from Mr. Arvind Bahuguna, Senior General Manager of Sokkia India and Mr. Norikazu Watanabe, Managing Director of Sokkia Singapore - highlighting the importance of using highly precise and reliable instruments for surveying. Sokkia will continue to research and develop break-through technology with the concept of “superfast” and “super precise” instrument for surveying and how such instruments can be transformed into other application, such as deformation monitoring and industrial measurement.

Presentations

Hands on

Participants were presented with Sokkia’s latest products such as the SDL1X digital level with 0.2mm accuracy, scalable GRX1 GNSS receiver, one-man survey SRX robotic total station, highly accurate NET05 industrial total station, SET50RX total station and the SDXpress field-to-finish software. All these instruments were on display for participants to have a feel and hands on experience with the advice from Sokkia technical support team.

With Sokkia’s patented technology such as RedTech & IACS(Independent Angular Calibration System), participants gained a first hand knowledge on what this technology is all about and how this technology separate Sokkia from competition in achieving the most precise and reliable readings.

“Sokkia @ Work”, showcases some mega projects done by customer using Sokkia’s instrument and how it provided unique solution and help to increase productivity. Some projects highlighted are deformation monitoring, construction of the Singapore Flyer as well as the building of South Africa Football Stadium for 2010 World Cup.

ANNOUNCEMENT

Release Date : 1 Feb 2010

At the end of the event, all participants were presented with "Certificate of Participation" as recognition for their participation and also goodie bags containing Sokkia's items for their practical use. For some lucky winners, they walked away with SDXpress-Standard software packages, Sokkia limited edition watches and the Sokkia automatic level during the lucky draw.

Some Lucky Winners

"I am happy that the event was very successful. Even though it was the worst fog condition in India in years, many people still came. We believed that this is only the start of more successful user conference in the future. We hope to double the number of attendees next year, and double again the year after that. Through this, I hope that the bonds between Sokkia and its customer will become even stronger." Mr. Watanabe on his opinion of the event.

Some testimonials from participants

"It is my pleasure to put on the record that "SOKKIA" company has conducted an excellent meeting to up-grade our knowledge and awareness about latest technology changes. We appreciate that this NEW SDXpress software will be very much helpful for us and we wish for excellent success for the same. We also wish to convey our best regards to the team for their kind co operation and support. Thanks "

VINIT SANCHETI

"Thanks a lot for the love shown during the conference and users meeting. Sokkia user conference was well organized. This was a good opportunity for us to see the range of Sokkia products. We found Sokkia India and Singapore team very professional in their work...."
