

SOKKIA

SDR+

Data Collection Software

Flexible. Powerful.

SDR+ data collection software is the most powerful and flexible software of its kind on the market. It offers an RTK filtering technique for quality assurance, modern graphic interface with fully customizable toolbar and the industry's only fully live data base and editing facility. Multifunctional SDR+ can be used with SOKKIA GPS instruments as well as SOKKIA's SRX Robotic Total Station.

SDR+ Features

- Create a job template with workflow options and tolerance checks for various survey types and apply them while you work
- Utilize with SOKKIA GPS instruments, conventional and motorized Total Stations on the same job
- Easy-to-use, icon-based interface
- Customize the screen to display your most commonly used functions
- Standard Windows® pull-down menus for ease of use – minimal training required
- The industry's only fully live editable database offers unparalleled flexibility
- Swap between coordinate systems with the push of a button
- Perform surveys in one coordinate system and download in any other system as required – including local systems
- Edit errors in the field, such as Target or Antenna Height errors, "on the go" and get immediate recalculation of coordinates – no need to edit after the survey
- Use control points from any coordinate system – transformation into your current coordinate system is instantaneous
- Perform ETS surveys and assign/change backsights at your convenience
- Configure the software to communicate utilizing *Bluetooth®* wireless technology – no need for cables or adapters
- Unparalleled Blunder Detection and data filtering guarantees data quality

Required
